HIPSTRUMENTS

Hip Repair Instruments

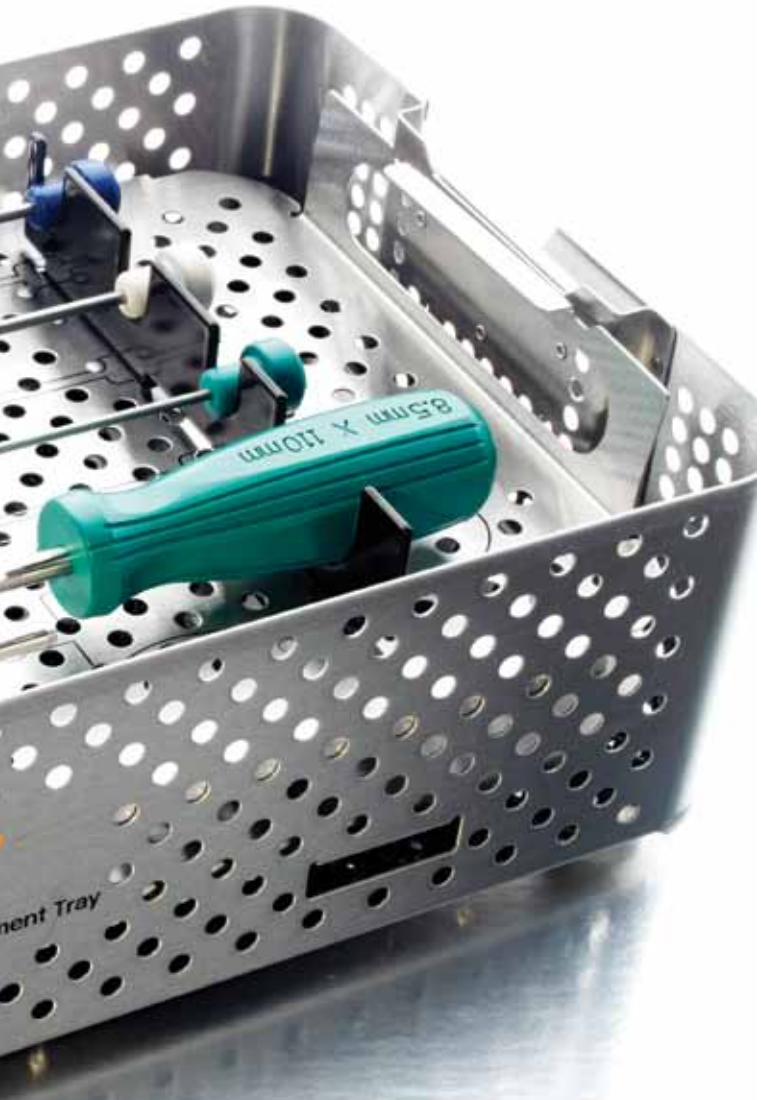

Introducing Hipstruments.

Hip-specific instrumentation exclusively designed for arthroscopic repair of the hip joint.

As innovation leaders in hip arthroscopy, we understand the necessity for tools that address the specific requirements of various hip procedures including repairing and managing soft tissue as well as treating chondral and cartilage defects.

We've got you covered. Our full range of procedure-enabling hip instruments have been designed and sized for effectively performing microfracture, rasping, cutting and more.

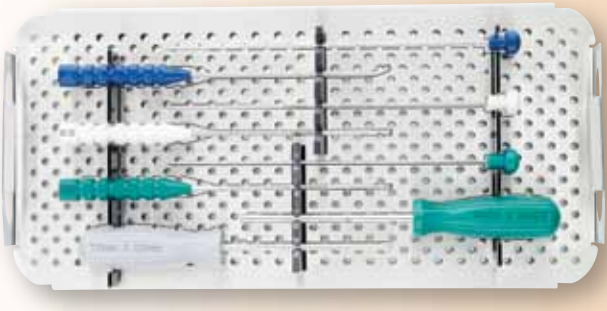

Conveniently packaged in a newly-designed, organized instrument tray. Hipstruments includes the following new hip-specifc products:

- **ARTHRO-PIERCE° XL** for piercing through tissue during suture manipulation
- **ARTHRO-ROUND XL** for grasping suture without piercing the tissue
- **Elevator XL** for taking down the labrum and managing soft tissue
- **Microfracture Picks XL, 30°, 45°, and 60°** choose from 3 angles, ideal for creating a bleeding bed in chondral defects/delamination
- **Open Curettes XL** suitable for removing damaged cartilage and exposing bone in chondral defects/delamination
- **Suture Cutter XL** efficiently cuts multiple high strength sutures while leaving a tail for knotted suture anchor applications. Extra long length for easy access to joint spaces
- **Suture Cutter Flush XL** for easy loading inside or outside of joint spaces, this instrument effectively cuts multiple sutures flushly and is ideal for knotless suture anchor applications
- **Rasp XL** ideal for creating a bleeding bed in sub chondral bone
- **Banana Knife** for performing capsullotomies and taking down the labrum
- **Knot Pusher XL** for use with a knotted suture anchor
